- [SECTION N — Sample Registered-Manufacturer Records \(Mobile Phones\)](#)

Compiled: 03 September 2026 | **Prototype:** SIH26 BIS AI Assistant (Team Byte Busters) **Companion to:** IS16102_LED_Lamp_BIS_Dataset.pdf (v1/v2) — same section structure, reused where the underlying rule is scheme-wide rather than product-specific.

SECTION A — Standard Identity & Classification

[CHUNK TYPE: structured-metadata] [RAG-TAG: standard_identity, classification, ics_code, is_13252_part1]

Field	Value
Standard number	IS 13252 (Part 1):2010
Identical/equivalent international standard	IEC 60950-1:2005
Title	Information Technology Equipment — Safety: Part 1 General Requirements (Second Revision)
Superseding IS	None (current edition still in force)
Degree of equivalence	Identical under dual numbering
Number of revisions	02 (this is the Second Revision)
Number of amendments	02 (Amendment 1, and Amendment 2 of March 2015)
Type of standard	Safety Standard
Language	English (also published in Hindi for gazette notices)
Reaffirmation year	December 2025
Department	Electronics and Information Technology Department (LITD)
Technical committee	LITD 07 — Audio, Video, Multimedia Systems and Communication Equipment Sectional Committee
Member Secretary	Vijay Kumar Gauraw (Scientist-D)
Group	Electronic and Telecom equipments, components and devices

Sub-Group	Electronic components and devices
Sub-Sub-Group	Electronic components
ICS Code	33.020; 35.260 (per the standard’s own cover page; the Know-Your-Standard classification tab lists ICS Code as N/A)
Certification field	N/A (compliance route is CRS registration, not a direct ISI certification field)
Relevant Ministries (classification tab)	N/A
Sustainable Development Goals tag	N/A

Correction versus the LED-lamp dataset: IS 13252 falls under **LITD 07**, not ETD 23 (the lamps committee). LITD 07 governs audio/video/multimedia/communication equipment and IT safety standards as a family — several other CRS-notified electronics standards (IS 616, IS 13252 all parts) sit under this same committee.

SECTION B — The IS 13252 Series: Related Parts

[CHUNK TYPE: structured-metadata] [RAG-TAG: series_overview, part_21, part_22, part_23]

IS 13252 is a multi-part series. Only **Part 1** is CRS-notified for the product categories in this dataset; the other parts are referenced within Part 1 or apply to specialised equipment classes.

Part	Title	Latest edition	Status
Part 1	General Requirements	2010 (Second Revision), IEC 60950-1:2005	Reaffirmed Dec 2025; Amendment 2 in force
Part 21	Remote Power Feeding	2013, IEC 60952-21	New Standard (no revision issued yet); reaffirmed 2025
Part 22	Equipment to be Installed Outdoors	2019 (First Revision) , IEC 60950-22:2016	Supersedes IS 13252 (Part 22):2014; established 22 May 2019, old edition cancelled 21 June 2019 (see Section E.3)
Part 23	Large Data Storage Equipment	2014, IEC 60950-23:2005	New Standard (no revision issued); reaffirmed 2020

Note for the assistant: a query about “IS 13252” without a Part number should default to **Part 1**, since that is the part actually notified under CRS for consumer/IT products (laptops, mobile phones, printers, etc.). Parts 21–23 are specialised (remote-fed equipment, outdoor-installed equipment, large storage arrays) and are not independently CRS-notified in the product list reviewed for this dataset.

SECTION C — Legal Foundation: 2012 CRS Order (Original Schedule)

[CHUNK TYPE: regulation-text] [RAG-TAG: legal_basis, crs_order_2012, is13252_original_schedule]

Reused from the LED-lamp dataset — the founding order is scheme-wide, not product-specific. Source: Gazette of India, Extraordinary, Part II-Section 3(ii), No. 1975, dated 3 October 2012, “Electronics and Information Technology Goods (Requirement for Compulsory Registration) Order, 2012,” issued under Section 10(1)(p) of the BIS Act, 1986. Core prohibition, sampling, and enforcement clauses are identical to those summarised in Section B of the LED-lamp dataset.

IS 13252 (Part 1):2010 in the original 2012 Schedule — implementation date 03 July 2013:

Product	Notified standard
Automatic Data Processing Machine	IS 13252(Part 1):2010
Laptop/Notebook/Tablet	IS 13252(Part 1):2010
Printers, Plotters	IS 13252(Part 1):2010
Scanners	IS 13252(Part 1):2010
Set Top Box	IS 13252(Part 1):2010
Telephone Answering Machines	IS 13252(Part 1):2010
Visual Display Units, Video Monitors of screen size 32” and above	IS 13252(Part 1):2010

Wireless Keyboards	IS 13252(Part 1):2010
--------------------	-----------------------

IS 13252 (Part 1) was therefore one of the standards present from the very first CRS schedule — unlike IS 16102 (LED lamps), which was added later.

SECTION D — 2014 Amendment Order: Products Added to the Schedule

[CHUNK TYPE: regulatory-notice] [RAG-TAG: legal_basis, crs_order_2014_amendment, mobile_phone_notification, power_bank_notification]

Source: Gazette of India, Extraordinary, Part II-Section 3(ii), No. 2330, dated 13 November 2014. Ref: F. No. 37(1)/2013-IPHW (Pt). Ministry of Communications and Information Technology (Department of Electronics and Information Technology). Signed by Dr. Ajay Kumar, Joint Secretary. This order added items S.No. 16–30 to the 2012 Order’s Schedule under Section 10(1)(p) of the BIS Act, 1986 read with Rule 13(fa) of the BIS Rules, 1987.

Items added that fall under IS 13252 (Part 1):2010:

S.No. (in 2014 gazette)	Product	Notified standard
16	Cash Registers	IS 13252(Part-1):2010
23	Mobile Phones	IS 13252(Part-1):2010
24	Rokad Bahiyan (Cash Registers, Hindi column duplicate entry)	IS 13252(Part-1):2010
25	Point of Sale Terminals	IS 13252(Part-1):2010
26	Copying Machines/Duplicators	IS 13252(Part-1):2010
27	Smart Card Readers	IS 13252(Part-1):2010
28	Mail Processing/Postage/Franking Machines	IS 13252(Part-1):2010
29	Passport Reader	IS 13252(Part-1):2010
30	Power Banks for use in portable applications	IS 13252(Part-1):2010

Implementation timing (Clause 2 of the order): the provisions of the 2012 Order (except paragraph 1(2)) apply to these added items six months from the date of publication of this notification for all items **except S.No. 20** (DC/AC Supplied Electronic Controlgear for LED Modules), for which a nine-month window applied. Cross-referencing the CRS product list from the earlier dataset build, this translates to a **13 May 2015** implementation date for most of these items, and **13 September 2015** specifically for Mobile Phones (the CRS product list’s own effective-date column shows Mobile Phones at 13 September 2015, distinct from the 13 May 2015 date for the other items added in this same gazette — the assistant should preserve this distinction rather than flattening all S.No. 16–30 items to one date).

Clause 3 (standing instruction): for all goods in the schedule, the latest standard as published and notified by BIS applies automatically six months after BIS notifies a new edition; already-registered products get surveillance-tested to the new edition, and renewal is done against the latest standard in force at the time of the renewal cycle. This is the same “living schedule” mechanism described for LED lamps.

SECTION D.2 — Mobile-Phone-Specific Add-On: Indian Language Support (IS 16333 Part 3)

[CHUNK TYPE: regulatory-notice] [RAG-TAG: mobile_phone_indian_language, is_16333_part3]

Source: Gazette of India, Extraordinary, Part II-Section 3(ii), New Delhi, 24 October 2016. Ministry of Electronics and Information Technology. Order signed by Rajiv Bansal, Joint Secretary, F. No. 8(81)2015-IPHW.

What it says: in exercise of the same Section 10(1)(p)/Rule 13(fa) powers, the Central Government includes Indian-language support for mobile-phone handsets, tested per **IS 16333 (Part 3):2016**, into the Schedule of the 2012 Order. All provisions of the 2012 Order (except paragraph 1(2)) apply to this addition **with effect from 1 July 2017**.

Practical significance: a mobile phone sold in India after this date needs conformity to **two** standards concurrently — IS 13252 (Part 1) for general electrical/IT safety, and IS 16333 (Part 3) for Indian-language keypad/UI support — both under the same registration number. This is confirmed by the registered-manufacturer sample data in Section N, where several mobile-phone R-numbers list scope as “IS 13252(Part 1):2010 / IEC 60950-1:2005 & IS 16333(Part 3):2017” or “...

& IS 16333(Part 3):2022”.

The note attached to this order also lists the full amendment history of the parent 2012 Order: originally published as S.O. 2357(E) dated 3 October 2012, and subsequently amended by S.O. 2034(E) dated 5 July 2013, S.O. 3022(E) dated 4 October 2013, S.O. 2905(E) dated 13 November 2014 (this is the Section D gazette above), S.O. 345(E) dated 3 February 2016, and S.O. 638(E) dated 10 February 2016.

SECTION E — Freshness Check: Amendments and Edition Status

[CHUNK TYPE: regulatory-notice] [RAG-TAG: freshness, amendment_2, withdrawal_check, high_value]

E.1 — Amendment No. 2 to IS 13252 (Part 1):2010 (March 2015)

This amendment is identical to Amendment 2 (2013) issued by the IEC to IEC 60950-1:2005. It is a substantial technical amendment touching dozens of clauses. Rather than reproducing the full replacement text, the key areas of change are:

- **Scope/definitions:** clarified that the standard also covers components/subassemblies intended for incorporation into IT equipment, external power supply units, and accessories — provided the complete end-equipment complies even if individual sub-parts don’t meet every clause independently. Updated the definition of rated voltage.
- **Components (Clause 1.5):** components complying with **IEC 62368-1** (the newer, hazard-based safety standard that is progressively replacing IEC 60950-1 series worldwide) are now accepted as part of IT equipment covered by this standard, without further evaluation beyond correct end-use application. This is a forward-compatibility bridge clause — the assistant should note that IEC 62368-1 alignment is already anticipated inside this 2015 amendment, which is relevant if a user asks whether India will eventually adopt IEC 62368-1-based IT/AV safety standards.
- **Capacitors bridging insulation (1.5.6):** revised capacitor rating table (Y1/Y2/Y4/X1/X2 subclasses) and revised rules for insulation types bridged.
- **SELV circuit fault-voltage limits (2.2.3):** replaced the single voltage-pulse figure with two scenarios — a 120 V-peak limit for a single pulse above V1, and a 71 V-peak limit where the pulse recurs more than once in the same time window — with new Figures 2E.1 and 2E.2.
- **Functional/protective earthing (2.6.2, Table 2D):** new marking rules for green-and-yellow functional-earthing-only conductors; minimum protective bonding conductor size increased from 16 to 20 (first column, first row of Table 2D).
- **Humidity conditioning (2.9.2):** tropical-use equipment must undergo 120 hours at (40±2)°C and (93±3)% relative humidity, with manufacturer consent to extend duration.
- **Clearances table (2.10.3, Table 2L):** revised clearance-vs-working-voltage table for primary circuits at 1500V/2500V mains transient voltage levels, replacing the earlier table.
- **AC power supply cords (3.2.5.1):** rewritten cord-type/rating requirements (rubber vs PVC sheathing per IEC 60227-1/-2, detachable vs non-detachable cord mass thresholds) and a new terminal-sizing Table 3E.
- **Batteries (4.3.8):** portable secondary sealed cells/batteries (other than button cells) with alkaline/non-acid electrolyte must comply with IEC 62133; new design requirements to reduce fire/explosion/chemical-leak risk, including reverse-polarity protection for user-replaceable batteries and a revised overcharging fault-simulation test (7-hour charge under simulated worst-case fault).
- **Annex Q (Voltage Dependent Resistors):** fully rewritten to require compliance with IEC 61051-2, with specific climatic category, continuous-voltage, and combination-pulse test parameters (6 kV/3 kA standard, 8 kV/4 kA for 600V-class equipment).
- **Annex U (Insulated winding wires used without interleaved insulation):** fully rewritten with new type-test methods (electric strength, flexibility/adherence, heat shock, retention of electric strength after bending) referencing IEC 60851 Parts 3/5/6.
- **Annex CC (IC current limiters):** revised fault-simulation test programs (Test Program 1/2/3), each specifying thousands of on/off switching cycles and thermal cycling, with a 5 A current-limiting compliance threshold.
- **Normative references (Annex P):** added IEC 60127-1 (miniature fuses), IEC 60227-1/-2 (PVC cables, replacing the withdrawn single-part IEC 60227), IEC 60998-1, IEC 60999-1/-2 (connecting devices), IEC 62133 (portable battery safety), and IEC 62368-1.

E.2 — Implementation Timeline for Amendment 2

Circular	Date	Content
CMD-3/16:13252	22 February 2016	Sc. F & Head (CMD-3), R.K. Kain — communicates Competent-Authority-approved implementation guidelines for

		Amendment 2; original last date for implementation set as 31 December 2016
CMD-III/16:13252	30 December 2016	A R Unnikrishnan, Head (CMD-III) / Head (Registration) — extends the implementation deadline for Amendment 2 from 31 Dec 2016 to 14 May 2017 ; all other implementation procedures unchanged

Practical rule for the assistant: as of today (3 September 2026), Amendment 2 has been fully in force since 14 May 2017 — any IS 13252 (Part 1):2010 registration or renewal from that date onward must test against the amended (post-Amendment-2) requirements, not the original 2010/pre-amendment text.

E.3 — Confirmed: No 2026 Re-edition of Part 1 (Negative Finding)

Unlike IS 16102 (LED lamps), which was superseded by a 2026 edition effective 2 February 2026, **no equivalent 2026 gazette establishing a new edition of IS 13252 (Part 1) was found** in the sources reviewed for this dataset. The Know Your Standard portal confirms: Superseding IS = None; Number of Revisions = 02 (Second Revision, unchanged); Reaffirmation Year = December 2025 (i.e. the 2010 text, as amended by Amendment 1 and Amendment 2, was simply reaffirmed rather than re-issued as a new edition). The assistant should state this as a **verified absence**, not an unchecked gap, if asked “is IS 13252 Part 1 still current” — yes, the 2010 Second Revision (with both amendments) remains the governing text as of the reaffirmation in December 2025.

E.4 — Part 22 Did Get a New Edition (2019)

For contrast/completeness: **IS 13252 (Part 22):2019/IEC 60950-22:2016** (“Equipment to be Installed Outdoors,” First Revision) was established via Gazette S.O. 1884(E), dated 27 May 2019 (Ministry of Consumer Affairs, Department of Consumer Affairs / BIS notification under Rule 15(2) of the BIS Rules, 2018), with an establishment date of **22 May 2019**. The superseded edition, IS 13252 (Part 22):2014/IEC 60950-22:2005, was cancelled effective **21 June 2019**. This same gazette (S.O. 1884(E)) established 26 other unrelated standards in the same batch (paint testing, moped components, welding quality, information-security standards, etc.) — it is a general omnibus notification, not specific to IT equipment.

SECTION F — Standard Mark & Labelling Requirements

[CHUNK TYPE: regulation-explanation] [RAG-TAG: standard_mark, labelling, r_number_format]

Reused from the LED-lamp dataset — this circular is scheme-wide. Source: BIS Central Marks Department-3, Ref: CMD 3/8:1/6975, dated 03.12.2015, signed by C.K. Maheshwari, DDG (Certification). Standard Mark notified via Gazette S.O. 3240(E) dated 01 December 2015; supersedes BIS/DGO/(405)/2014 dated 31 July 2014.

Key rules (unchanged from the LED-lamp writeup): the Standard Mark is a fixed pictorial “S” monogram (interlocking blue-and-red arrows), single or multi-colour (Oriental Blue/Monopol Red for print per IS 1222:1992, or French Blue No.166/Red No.537 for signboards per IS 5:1994); registered users may use either the Standard Mark **or** the words “Self Declaration — Conforming to IS...”, both paired with the registration number in format **R-XXXXXXXX** (8 digits); minimum display size Arial font 6; marking must be legible, indelible, non-removable, and durable per the relevant product standard’s own marking-durability clauses.

This rule applies identically to IT-equipment registrants: a mobile phone, laptop, or power bank registered under IS 13252 (Part 1) displays either the Standard Mark or the self-declaration text plus its R-number, exactly as an LED lamp would.

SECTION G — Registration, Renewal & Inclusion Process

[CHUNK TYPE: process-explanation] [RAG-TAG: certification_process, renewal, inclusion]

G.1 — New Registration

Reused from the LED-lamp dataset: apply online → submit BIS-recognised-lab test reports → (foreign applicants without an Indian office) appoint an Authorized Indian Representative (AIR) → submit affidavit-cum-undertaking (Format A/B for AIR, Format C for domestic applicants) → pay CRS fee → complete Form VI online → submit hard copies within 15 days of online submission (non-receipt within 15 days auto-closes the application) → BIS scrutiny and query resolution → grant letter uploaded to the applicant’s portal. Normal processing time: 20 working days, First-Come-First-Serve from hard-copy receipt date.

G.2 — Renewal (confirmed step list from the CRS portal’s “Instruction for Renewal of Registration” page)

Registration is granted for an initial **two years** and is renewable for further two-year cycles. Steps:

1. Click the submitted application on the registrant’s dashboard, then click “Request renewal.”
2. Fill in production-report details.
3. Declare the quantity marked with “Self Declaration — Conforming to IS...” or the Standard Mark.
4. Upload a PDF listing the names and addresses of major distributors.
5. Upload a duly filled **Form IX** and fee details.
6. Make payment.
7. Foreign registrants with no Indian liaison/branch office must have an Authorized Indian Representative in place per the BIS AIR guidelines and nomination form (same as new registration).
8. AIRs of foreign registrants submit an affidavit-cum-undertaking per Format A/B; domestic registrants submit Format C.
9. Submit hard copies of the renewal application and supporting documents within 15 days of online submission.

This matches the general FAQ guidance already captured for LED lamps (Section E.2 of that dataset): retesting is not specifically mandated for renewal, but may be required if a test report against the latest standard edition is unavailable (Order dated 13 Nov 2014, para 3) — directly relevant here since IS 13252 (Part 1) has had two amendments since 2010.

G.3 — Inclusion of New Models

Same process as the LED-lamp dataset: test the new model at a BIS-recognised lab (report under 90 days old at submission) → sign in → “Request model inclusion” → upload test report, undertaking, fee details → submit online, then hard copies within 15 days. Normal time for grant: 10 working days.

SECTION H — Technical Committee: LITD 07

[CHUNK TYPE: structured-metadata] [RAG-TAG: technical_committee, litd07]

Field	Value
Full name	LITD 07 — Audio, Video, Multimedia Systems and Communication Equipment Sectional Committee
Department	Electronics and Information Technology Department (LITD)
Chairperson	Mr. Ved Prakash (ADG(E)/IC, Directorate General Doordarshan, Prasar Bharti, New Delhi) — since June 2025
HOD	Jitender Kumar
Member Secretary	Vijay Kumar Gauraw
Published standards	146
Standards under development	5
Total members	50
Scope	Preparing Indian Standards, including safety requirements, for audio/video/multimedia systems and equipment, acoustics, and electroacoustics (scope text truncated in source; broader remit covers IT-equipment safety standards such as IS 13252 by longstanding practice)

Functional category breakdown (50 members):

Category	Count
Academic Institution	11
Central Ministry/Dept.	12
Consumer Group	1
Large Scale Industry	5
Industry Association	7
Regulatory Body	2

R&D Organization	5
MSME	2
Laboratory	1
Technical Professional Bodies	1
In Personal Capacity	2
State Government / Users-Organized Buyers / Industry Association (MSME) / Unclassified	0 each

Notable member organisations: Directorate General Doordarshan (chair), Ahuja Radios, Bharat Electronics Limited, Dell Technologies, Dolby Technology India, Dish TV, Electronic Industries Association of India, Indian Cellular and Electronics Association, CSIR-CEERI, CSIR-NPL, IIT Delhi, IIT BHU, Manufacturers Association for IT (MAIT), Tata Play Limited, Telecom Regulatory Authority of India (TRAI), Telecommunication Engineering Centre (TEC), VOICE (consumer group). Next scheduled meetings: 42nd Sectional Committee Meeting (Hybrid, 10 December 2026) and 43rd (Hybrid, 12 February 2027).

Use case: if a user asks “who governs mobile phone / IT equipment safety standards in India,” “which companies sit on the committee for laptop safety rules,” or “when does the IT-equipment standards committee meet next,” this section answers with real names and dates.

SECTION I — BIS Contacts

[CHUNK TYPE: structured-record] [RAG-TAG: contacts]

Reused from the LED-lamp dataset (scheme-wide, not product-specific):

Category	Contact
CRS Registration Department	Room 407, Manakalya Building, BIS, 9 Bahadur Shah Zafar Marg, New Delhi-110002. Phone: +91-11-23230856. Email: registration@bis.org.in
CRS Grievance/escalation	DDG (MSCD & Registration). Email: ddgmscd@bis.gov.in
General BIS Helpdesk	9 Bahadur Shah Zafar Marg, New Delhi-110002. Phone: +91-76-6908-9323. Email: helpdesk@bis.gov.in
LITD 07 Committee (technical queries)	Member Secretary: Vijay Kumar Gauraw, via BIS Electronics and Information Technology Department
Original notifying ministry	Ministry of Electronics & Information Technology (MeitY), Electronics Niketan, 6 CGO Complex, Lodhi Road, New Delhi-110003

A live operational note captured from the CRS Registered-Manufacturers search page (dated 3 Sept 2026): the **Quality Control Order on Essential Requirements for Security of CCTV Cameras** was implemented w.e.f. **09.04.2025** — the page instructs applicants to contact the Registration Department (registration@bis.gov.in) directly for the approved scope of CCTV camera models, since CCTV cameras/recorders (also tested under IS 13252 (Part 1) at many of the labs in Section M) now have an additional, separate cybersecurity-focused QCO layered on top of the base electrical-safety registration.

SECTION J — Relevant FAQ Excerpts (IT-Equipment / Mobile-Phone-Specific)

[CHUNK TYPE: qa-pairs] [RAG-TAG: faq, edge_cases, product_coverage]

Reused and re-emphasised from the LED-lamp dataset’s Section H, since these entries are directly about IS 13252-covered products:

- **OEM products with existing CE/UL/FCC marks:** not accepted as-is; a valid BIS-recognised-lab test report (under 90 days old) against the Indian Standard is mandatory regardless of foreign certification.
- **Mobile phone chargers:** covered under the Order as their own notified product (power adaptors), separately from the phone itself.
- **Consolidated products (e.g. laptop or mobile phone with battery + adaptor):** the overall product carries its own registration number; the battery and adaptor, being independently notified goods, must also carry their own independent registration numbers when sold/considered separately from the main product.

- **Power banks — which standard applies:** power banks with USB charging and **no** internal electronic/charge-controlling circuit are treated as batteries and tested under IS 16046; power banks **with** internal electronic circuitry remain Power Banks under IS 13252 (Part 1), as in this dataset’s Section D table.
- **Manufacturing vs import date basis:** domestic goods use date of manufacture; imported goods use date of landing of the consignment in India, when checking against notified deadlines (directly relevant to phones/laptops, which are heavily import-driven).
- **Who gets the registration number:** the manufacturer (linked to manufacturer + factory location + product + brand), not the importer.
- **Registration per manufacturing location:** a separate registration and separate test report is required for each manufacturing location, even for an identical phone/laptop model — this explains why the sample R-number data in Section N shows many different Chinese factory addresses (Shenzhen, Huizhou, Dongguan, etc.) each holding independent registrations for what may be the same retail brand.
- **Multiple brands under one manufacturer:** each brand must be registered separately, though a common test report can be used if the product and manufacturing location are identical, provided all brands/models are listed in the test report — this matches the pattern in Section N where a single manufacturer address sometimes shows multiple brand names across different R-numbers (e.g. contract manufacturers producing for Micromax, Intex, HTC, Lenovo, Asus from the same or related Chinese facilities).
- **Highly Specialized Equipment (HSE) exemption:** exempted if under 100 units/model/year and meeting a threshold (3-phase power; single-phase current >16A; dimensions >1.5m×0.8m; or weight >80kg) — relevant for large server/ADPM equipment under IS 13252 (Part 1) rather than consumer phones.
- **Penalty for unregistered sale:** prosecution under Clauses 3(2) and 4(3) of the 2012 Order, plus 2(a)(2) of the 25 June 2013 amendment order.

SECTION K — Applicant Testing Handbook: This Product IS In Scope

[CHUNK TYPE: process-template] [RAG-TAG: testing_submission, applicant_checklist]

The MeitY “Handbook of Information — Applicant Guidelines for Submission of Items for Testing” covers several IS 13252 (Part 1) product categories, because they were part of the original 15-category 2012 Order (Section C above) — specifically Automatic Data Processing Machine, Laptop/Notebook/Tablet, Printers/Plotters, Scanners, Set Top Box, Telephone Answering Machines, Visual Display Units, and Wireless Keyboards.

Products added later (Section D — Mobile Phones, Power Banks, Cash Registers, Point of Sale Terminals, Copying Machines, Smart Card Readers, Mail Processing Machines, Passport Readers) entered the schedule via the 2014 amendment. For these, the general applicant workflow and the reusable I.2 information-sheet template below apply (applicant/manufacturer details, test item description, rated current/voltage, dimensions/mass, IP rating, series-formation basis, safety-critical-components list with each component’s manufacturer/type/technical data/standard mark/test-report reference).

General workflow (unchanged across all CRS products): confirm applicability against the founding Order → check the official FAQ for edge cases → form a product series per BIS Series Approval Guidelines where applicable → prepare the product-wise information sheet → select a BIS-recognised lab that can test the specific product (Section M) → contact the lab, complete paperwork and payment → obtain a Probable Date of Completion → cooperate during testing → collect the tested item, spare, and test report → retain the tested item in safe custody → initiate BIS registration (Section G).

SECTION L — National Foreword & Standard Description

[CHUNK TYPE: standard-clause-text] [RAG-TAG: national_foreword, scope_summary, is13252_part1]

National Foreword (paraphrased, per the standard’s own cover pages): IS 13252 (Part 1) is identical with IEC 60950-1:2005, adopted by BIS on the recommendation of the (then) Computer Hardware, Peripherals and Identification Cards Sectional Committee and approved by the Electronics and Information Technology Division Council. The standard was first published in 1992, identical to IEC 950:1986; revised in 2003 based on ISO/IEC 60950-1:2001; and revised again (this Second Revision) to align with IEC 60950-1:2005. Where the IEC text says “International Standard,” this should be read as “Indian Standard”; where the IEC text uses a comma as a decimal marker, Indian practice uses a point.

Coverage and purpose (paraphrased from the standard’s public description): the standard sets safety requirements for IT equipment — including servers, workstations, laptops/notebooks/tablets, networking devices (routers, switches, firewalls, access points), storage systems, and peripherals (keyboards, mice, monitors, printers) — operating at voltages up to 600V. Testing verifies protection against electric shock, touch current, and equipment behaviour under abnormal/fault conditions; mechanical-hazard testing covers stability, mechanical strength, protection against hazardous

moving parts, and accidental contact with live parts; thermal requirements guard against overheating and fire hazards. MeitY has mandated BIS registration against this standard for numerous IT products via the QCO mechanism (the 2012 Order and its amendments) specifically to prevent dumping of non-compliant goods into the Indian market.

SECTION M — BIS-Recognised Testing Laboratories for IS 13252 (Part 1):2010

[CHUNK TYPE: structured-record] [RAG-TAG: labs, testing_charges, lab_directory] [Recommended: one chunk per lab for precise retrieval]

72 labs are currently recognised for IS 13252 (Part 1):2010 testing (source: BIS LRS lab-search portal, list dated 3 September 2026). Almost all labs carry a broadly similar exclusion set — components (CI.1.5), cathode ray tubes (CI.4.2.8), ionizing radiation (CI.4.3.13.2), UV radiation effects (CI.4.3.13.3/Annex Y), human UV exposure (CI.4.3.13.4), and laser/LED class (CI.4.3.13.5) are the most commonly excluded test items across the directory — meaning most labs sub-contract or waive these specific hazard tests. Representative entries (condensed; charges exclude taxes):

Lab	Location	Indicative charge	Validity	Notable scope/exclusion
URS Products and Testing Pvt. Ltd.	Noida, UP	₹45,000	—	Ionizing radiation, UV effects excluded; included w.e.f. 23.06.2026
Electrical Research & Development Association (ERDA)	Vadodara, Gujarat	₹1,04,850	30 Nov 2028	Broad IT-equipment scope
Vimta Labs Limited	Hyderabad, Telangana	₹45,000	31 Mar 2028	Included w.e.f. 16.02.2026
Intertek India Pvt. Ltd.	New Delhi	₹1,75,000	27 Apr 2029	Full-range charge across most ITE categories
Perfect International Testing Lab	Ghaziabad, UP	₹35,000	02 Sep 2028	Extensive exclusion list incl. Annex CC, K, Q, U
International Testing and Compliance (OPC) Pvt. Ltd.	Faridabad, Haryana	₹50,000	—	No facility for components, CRT, ionizing/UV/LED radiation, thermal control
Karandikar Laboratories Pvt. Ltd.	Boisar, Maharashtra	₹90,000	—	Broad IT-equipment scope
EAMP Laboratories LLP	Palghar, Maharashtra	₹25,000	13 Sep 2028	—
Alpha Test House Pvt. Ltd.	Bahadurgarh, Haryana	₹50,000	08 May 2028	Standard exclusion set; included w.e.f. 17.06.2025
ETDC (STQC), Bengaluru — Safety Lab	Bengaluru, Karnataka	₹78,000	31 Dec 2026	Government (STQC) lab
Kailtech Test and Research Centre	Indore, MP	₹60,000	18 Dec 2027	—
SAMEER — Electronic Safety Test Laboratory	Mumbai (CBD Belapur), Maharashtra	₹1,09,300	04 Dec 2028	Government (SAMEER) lab; excludes safety interlocks, SMPS transformer/inductor, winding wires
Planet Electro Labs Pvt. Ltd. (Wazirpur)	New Delhi	₹40,000	08 May 2028	—
SGS India Pvt. Ltd.	Bengaluru, Karnataka	₹1,15,000	17 Nov 2027	—
Central Electronics Centre, IIT Madras	Chennai, Tamil Nadu	₹68,000	31 Dec 2029	Academic-institution lab
Mighty Testing Pvt. Ltd.	Ghaziabad, UP	₹40,000	05 May 2028	—
TUV India Pvt. Ltd. (Peenya)	Bengaluru, Karnataka	₹60,000	—	—
ERTL (West), STQC	Mumbai, Maharashtra	₹78,000	31 Dec 2026	Government (STQC) lab
Star Wire (India) Laboratories	Ballabgarh, Haryana	₹62,500	17 Sep 2027	—

EMC Testing and Compliance LLP	Gurugram, Haryana	₹45,000	19 Jul 2027	Video displays restricted to 90"
TUV India Pvt. Ltd. (Pune)	Pune, Maharashtra	up to ₹1,10,000 (by product)	31 Dec 2029	Full ITE range with per-product pricing
ICAT	Gurugram, Haryana	₹1,66,250	31 Dec 2026	Automotive-technology institute, also ITE-recognised
Classic Testing & Research Centre	Noida, UP	₹45,000	15 Oct 2027	Included w.e.f. 26.11.2024
HT Product Services Pvt. Ltd.	Noida, UP	₹60,000	03 Dec 2026	—
National Test House (NTH)	Kolkata, WB	₹50,000	08 Apr 2027	Government lab
CSA India Pvt. Ltd.	Bengaluru, Karnataka	₹1,05,000+	08 Jun 2027	Included w.e.f. 20.12.2021
TUV Rheinland (India) Pvt. Ltd.	Gurugram, Haryana	up to ₹1,34,000	—	Full ITE range with per-product pricing
UL India Pvt. Ltd. (Bengaluru)	Bengaluru, Karnataka	up to ₹1,70,000	12 May 2027	Full ITE range with per-product pricing
ACE Test Lab Pvt. Ltd. (Delhi)	New Delhi	up to ₹70,000	07 Jan 2027	—
Bharti Automation Pvt. Ltd.	Gurugram, Haryana	up to ₹52,500	05 Aug 2027	20% discount to BIS
ERTL (East), STQC	Kolkata, WB	up to ₹1,10,500	—	Government (STQC) lab
Bureau Veritas Consumer Products Services	Noida, UP	up to ₹1,11,500	31 Dec 2029	15% discount to BIS
Sunren Telecom Laboratory	Navi Mumbai, Maharashtra	up to ₹1,95,000	15 Mar 2027	All type/size scope declared
Accurate Test Solutions LLP	Noida, UP	₹45,000	04 Jul 2027	10% discount to BIS
TUV SUD South Asia Pvt. Ltd. (Bengaluru, BK Palya)	Bengaluru, Karnataka	₹1,60,000	11 Sep 2027	10% discount to BIS
React Compliance and Testing Laboratories	Bengaluru, Karnataka	up to ₹75,000	10 Mar 2027	—
Standard Testing and Compliance Pvt. Ltd.	Faridabad, Haryana	up to ₹50,000	10 Jul 2027	—
Spectro Analytical Labs Pvt. Ltd.	Gautam Buddha Nagar, UP	up to ₹1,50,000	04 Jan 2030	—
ERTL (North), STQC	New Delhi	up to ₹1,10,500	31 Dec 2026	Government (STQC) lab
Absolute Expertise Testing Laboratory LLP	New Delhi	₹48,000	11 Mar 2027	Included w.e.f. 11.06.2024
Nemko India (Test Lab) Pvt. Ltd.	Faridabad, Haryana	up to ₹1,35,000	31 Dec 2029	—
Planet Electro Labs Pvt. Ltd. (407)	New Delhi	₹40,000	05 Nov 2029	Included w.e.f. 30.05.2024
Bharat Test House Pvt. Ltd.	Sonipat, Haryana	₹38,500	19 Mar 2029	—
AA Electro Magnetic Laboratory	Gurugram, Haryana	₹75,000	24 Sep 2026	Displays restricted to 80", excludes CRT
IEC Test Labs LLP	New Delhi	₹50,000	07 Sep 2029	20% discount to BIS; included w.e.f. 11.01.2022
Global Compliance Laboratory India	Ghaziabad, UP	₹75,000	20 Jun 2029	Class-1/2/3 product scope
Astute Labs Pvt. Ltd.	Pune, Maharashtra	₹60,000	05 Nov 2029	Very broad declared scope (CPU/disk drives/GPU/network gear etc.)
Atharva Laboratories Pvt. Ltd. (2 locations, Noida)	Noida, UP	₹45,000–52,000	21 Jul 2028 / —	—

Marquis Technologies Pvt. Ltd.	Noida, UP	₹50,000	13 Dec 2029	—
National Research and Technology Consortium (NRTC)	Parwanoo, HP	₹83,600	10 Apr 2029	50 Hz only
Vardhamana Testing Laboratory	Greater Noida, UP	₹40,000–65,000 (Class I/II vs III)	29 Apr 2027	Tiered by product class
Absolute Testing Services	Faridabad, Haryana	₹45,000	13 Nov 2026	—
ATCC Test Labs LLP	New Delhi	₹50,000	15 Jun 2029	—
Swastik Electronics Testing Centre	Ghaziabad, UP	₹45,000	15 May 2028	Included w.e.f. 17.06.2019
Techvision Testing Lab Pvt. Ltd.	New Delhi	₹45,000	16 Jul 2029	—
Classic Instrumentation Pvt. Ltd.	Noida, UP	₹40,000	23 Oct 2028	—
Conformity Testing Labs Pvt. Ltd. (2 units, New Delhi)	New Delhi	₹1,60,000–2,00,000	19 Sep 2028	Full ITE range with per-product pricing
Delhi Test House (2 locations, Sonipat & Azadpur)	Haryana / Delhi	₹1,15,000–1,17,000	23 Jun 2028 / 17 Jun 2027	Full ITE range with per-product pricing
Hi Physix Laboratory India Pvt. Ltd.	Pune, Maharashtra	₹1,38,952	20 Jun 2028	—
UL India Pvt. Ltd. (Gurgaon)	Gurugram, Haryana	₹1,95,000	07 Aug 2028	—
Yadav Measurements Pvt. Ltd.	Udaipur, Rajasthan	₹80,000	—	—
SKC Compliance Lab Pvt. Ltd.	Bengaluru (Mahadevpura), Karnataka	₹1,20,000	24 May 2028	Displays restricted to 60"
Bluesky Lab LLP	Ghaziabad, UP	₹40,000	22 May 2028	—
Matrix Test Labs	New Delhi	up to ₹1,25,000	31 Dec 2029	—
Nextron International Lab	Bawana, Delhi	₹50,000	—	Restricted to ≤300V AC 50Hz / 150V DC; also lists Smart Speakers in scope
Aforeserve Labs Pvt. Ltd.	Gurugram, Haryana	₹35,000	06 Jun 2027	10% discount to BIS
KC India Test Laboratories LLP	Ghaziabad, UP	₹35,000	06 Jun 2027	—
Ace Test Labs & Metrology Pvt. Ltd.	Sonipat, Haryana	₹1,20,800	14 Nov 2027	—

SECTION N — Sample Registered-Manufacturer Records (Mobile Phones)

[CHUNK TYPE: structured-record] [RAG-TAG: registration_records, r_number_samples, mobile_phone]

Source: CRS Registered Manufacturers search (crsbis.in), filtered to Product Name = “Mobile Phone” — 1,705 total entries exist for this filter; a representative sample follows.

R-Number	Manufacturer	Country	IS number(s)	Grant date	Status	Validity	Brand
R-41013730	Hong Fu Jin Precision Electronics (Zhengzhou) Co., Ltd.	China	IS 13252(Part 1):2010/IEC 60950-1:2005 & IS 16333(Part 3):2022	16-04-2015	Registered	15-04-2029	Apple
R-41013870	Luxsan Precision Industry (Kunshan) Co.,	China	IS 13252(Part 1):2010/IEC 60950-1:2005	21-04-2015	Registered	20-04-2029	Apple

Patterns visible in the fuller dataset (useful for the assistant's own reasoning, not to be presented as exhaustive):

- **Status distribution** is mixed — Registered (currently valid), Expired (lapsed, not renewed), and Cancelled (revoked before natural expiry) all appear. The assistant should never assume a brand name in this list is currently compliant without checking the specific R-number's live status, since brands frequently hold multiple R-numbers across different contract manufacturers and time periods, some current and some lapsed.
- **Contract manufacturing pattern:** well-known consumer brands (Apple, Samsung, Xiaomi/Redmi, HTC, Lenovo, Sony, Micromax, Intex, vivo, honor, Motorola, Nokia, Asus) are fulfilled through many different Chinese/Vietnamese/Taiwanese contract manufacturers (Foxconn-linked entities like Hong Fu Jin Precision, FIH Precision, Luxsan Precision; BYD Electronic; Longcheer Electronics; Compal; Wistron-linked Arima Communications, etc.), each holding independent registrations tied to their specific factory address — consistent with the FAQ rule in Section J that registration is per manufacturing location.
- **IS 16333 (Part 3) attachment:** registrations granted or renewed after 1 July 2017 increasingly show the combined scope "IS 13252(Part 1):2010 & IS 16333(Part 3):20XX" rather than IS 13252 alone, reflecting the Section D.2 Indian-language-support mandate taking effect.
